

COGRI GROUP

CONCRETE GRINDING LTD
Global Flooring Solutions

Concrete Grinding Limited are specialists in the enhancement of floor flatness, particularly in narrow aisles and have developed the Laser Grinder®, the Worlds most advanced laser-guided grinding system. The Laser Grinder® enables aisles on new and existing floors to be upgraded to the flatness standards required to operate VNA forklift trucks safely and at their optimum efficiency. Used in new and operational warehouses it is clean, quick and very effective, while offering little disruption to the ongoing warehouse activities.

FACE CONSULTANTS LTD
Global Flooring Consultants

As Worldwide leaders in floor flatness compliance testing and on-site monitoring, Face Consultants Limited offer very rapid, accurate and independent results for Defined Movement (narrow aisle) and Free Movement (open area) surveys to British (TR34), German (DIN), American (Fmin) and other standards. They will also ensure that floor flatness is correctly specified, will ensure that the flooring contractor has the required expertise to meet the required specification and will check the finished floor for specification compliance.

CG FLOORING SYSTEMS LTD
Specialists in Industrial Flooring

CG Flooring Systems Limited are specialists in the repair and upgrading of warehouse and industrial floor slabs. Their practical experience enables them to give sound professional advice and offer cost effective repair options to flooring problems, such as joint failure and surface delamination/failure. Where floor surface renewal is recommended, they can offer an environmentally friendly, hard-wearing, pump-applied cementitious floor topping – Fastfloor-IT, which enables a floor to be returned to use very quickly; as well as a range of basic or specialist epoxy coatings and toppings.

Specialists in **Industrial** Flooring

speed > precision > quality

COGRI GROUP

>> The **CGFS** Screed Systems <

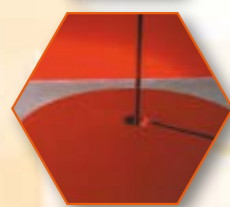

>> Cementitious Pumpable Screeds

This fast track industrial grade system can be laid to a minimum of 5mm thick and is hard enough for foot traffic within a number of hours, thus reducing down time.

>> Sand Cement Screeds

A traditional system widely used on floors where falls need to be considered. Can also be used in areas of height make up and ramping.

>> Epoxy Screed

This high quality, hard wearing, maintenance-free surface can be laid from 2mm thick. It comes in a range of colours and is suitable for use in clean rooms, laboratories and in the retail trade.

>> Screeds For Heated Floor Systems

Screeds for heated floors using pump applied screeds or insitu concrete.

With today's **modern technology in materials and machines** there is no need to pull up your old floor...

>> The **CGFS** Coating Systems <

>> Water Dispersed Epoxy Coating

An ideal solution for sealing an operational industrial floor. This solvent free vapour permeable coating can be applied to new and old floors.

>> Solvent Free Epoxy (High Build)

A thicker grade of coating used to seal old industrial floors with high traffic use, giving an easy clean surface and is available in a wide range of colours.

>> Anti Static Coating

Applied in plant rooms and laboratories where the risk of static build up needs to be eliminated.

For a site visit or **advice on the best solution** speak to the **experts...**

>> The **CGFS** Preparation & Repair Systems <

>> Surface Preparation

Fast, dust-free preparation systems are used in the first stages of upgrading industrial floors. Road planing, captivated shot blasting and dust free vacuum enhanced grinding are just a few systems available.

>> Joint Repairs

When joints fail due to impact damage or bad design, the only solution is the proven CG Flooring Systems solution.

>> Diamond Drilling & Cutting

Our mobile equipment is used for core sampling and bolt removal.
